PROPERTIES DURING THE OPERATION OF A POWER PLANT**

FIRST OFFICE ACTION

DECLARATION

The Examiner points out that the Applicant's declaration sets forth no mention or claim for priority of PCT/EP04/53039.

CLAIMS

35 U.S.C. § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 10-20 are rejected under 35 U.S.C. 101 because under the office's new guidelines the claimed invention is directed to non-statutory subject matter. The claims are non-statutory because they are directed to a method which does not produce a useful, concrete, and tangible result.

35 U.S.C. § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 14 and 16-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which the Applicant regards as the invention because the following phrases lack antecedent basis:

Claim 14, "the real gas factor",

Claim 16, "the real gas factor",

Claim 17, "the mass-related heating value",

Claim 18, "the volume-related heating value", and

Claim 19, "the Wobbe index".

Furthermore, claim 20 fails to distinctly claim the subject matter since the phrase "using mathematical methods" is indefinite as to the specific meaning thereof.

Claims 10-20 are rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential structural cooperative relationships of elements, such omission amounting to a gap between the necessary structural connections. See MPEP § 2172.01. The omitted structural cooperative relationship is how the determining of a fuel heating value and a fuel standard density relates to the other steps as claimed in claim 10.
